Current understanding of neurological disease has been evolving over the past 150 years. With the increasing and earlier sub-specialization of neurology trainees, and their variable exposure to higher academic study, there is little opportunity to put this development into a historical context as a whole. Understanding the 'evidence-base', or appreciating the lack of it in some cases, is an important part of training but this is rarely presented in a palatable, entertaining form. Part of the Landmark Papers in series, this book brings together the ten most important papers for each sub-speciality within neurology, covering the full range of major neurological conditions. Papers have been selected by leading international experts, who not only summarize what each paper showed, but place them into a wider context that makes a coherent story of how their sub-speciality has developed. For the first time, the controversial issue of physical contact in the consulting room is explored by distinguished psychoanalysts and psychotherapists representing a diverse range of psychoanalytic viewpoints. The contributors focus on the unconscious meanings of touch, or absence of touch, or unwelcome touch, or accidental touch in the psychoanalytic clinical situation. There are plenty of clinical vignettes and the discussions are grounded in clinical experience. Out of all medical and therapeutic treatments, psychoanalysis remains one of the very few that uses no physical contact. Sigmund Freud stopped using the 'pressure technique' in the late 1890s, a technique whereby he would press lightly on his patient's head while insisting that they remembered forgotten events. He gave up this procedure in favour of encouraging free association, then listening and interpreting without touching his patient in any way. Psychoanalysis was born and the use of touch, as a technique reminiscent of hypnosis, was explicitly prohibited. The avoidance of physical contact between the analyst and patient was established as a key component of the classical rule of abstinence. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. Math 1 A After 1905, physics would never be the same. In those 12 months, Einstein shattered many cherished scientific beliefs with five great papers that would establish him as the world's leading physicist. On their 100th anniversary, this book brings those papers together in an accessible format. Objective History of Modern India (Topicwise Previous Papers) for UPSC & State PSC Exams Consists of reprints of articles from various journals.
