WALNECK'S CLASSIC CYCLE TRADER, JULY 2009 Sep 26 2022
Tracking Hermes, Pursuing Mercury Apr 28 2020 Of all the divinities of classical antiquity, the Greek Hermes (Mercury in his Roman alter ego) is the most versatile, enigmatic, complex, and ambiguous. The runt of the Olympian litter, he is the god of lies and tricks, yet is also kindly towards mankind and a bringer of luck. His functions embrace both the marking of boundaries and their transgression, but also extend to commerce, lucre, and theft, as well as rhetoric and practical jokes. In another guise, he plays the role of mediator between all realms of human and divine activity, embracing heaven, earth, and the netherworld. Pursuing

this elusive divinity requires a truly multidisciplinary approach, reflecting his prismatic nature, and the twenty contributions to this volume draw on a wide range of fields to achieve this, from Greek and Roman literature (epic, lyric, and drama), epigraphy, cult, and religion, to vase painting and sculpture. In offering an overview of the myriad aspects of Hermes/Mercury-including his origins, patronage of the gymnasium, and relation to other trickster figures-the volume attempts to track the god's footprints across the many domains in which he partakes. Moreover, in keeping with his deep connection to exchange, commerce, and dialogue, it aims to exemplify and further encourage discourse between Latinists and Hellenists, as well as between scholars of literary and material cultures.

The Life of the Automobile Jul 12 2021 In this book Steven Parissien examines the impact, development and significance of the automobile over its turbulent and colourful 130-year history. He tells the story of the auto, and of its creators, from its earliest appearance in the 1880s - as little more than a powered quadricycle - via the early pioneer carmakers, the advances of the interwar era, the 'Golden Age' of the 1950s and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973, which culminated in the global mergers of the 1990s and the bailouts of the early twenty-first century. This is not just a story of horsepower and performance. The Life of the Automobile is a tale of people: of intuitive carmakers such as Benz, Agnelli, Royce and Citron; of exceptionally gifted designers such as Issigonis, Lefebvre, Michelotti and Bangle; and of visionary industrialists such as Ford, Tata and Porsche. Above all, The Life of the Automobile demonstrates how the epic story of the car mirrors the history of the modern era, from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later.

Mini Down Under Jan 06 2021 *Mini Down Under* traces the history of one of New Zealand's - and the world's - best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of competition success in the Antipodes, the local assembly and marketing of the classic original car and the eventual development into the latest generation Mini for a new century.

Traffic May 10 2021 Get stuck in ... Why do some people become demons when they get behind a wheel? Why does the other lane always move faster? Why do New Yorkers jaywalk (and nobody does in Copenhagen)? And why should you never drive with any beer-drinking, divorced doctors named Fred? Driving is about far more than getting from A to B. As Tom Vanderbilt's brilliant, curiosity-filled book

shows, it's actually the key to deciphering human nature and ... well, pretty much everything. From the etiquette of horn-honking to bumper stickers you should avoid, from gridlock in ancient Rome to why getting rid of road signs actually reduces accidents, Traffic will change the way you see yourself, and other people (and not just through your windscreen). *Business Periodicals Index* Jan 26 2020

Golden Dreams Oct 23 2019 A narrative tour de force that combines wide-ranging scholarship with captivating prose, Kevin Starr's acclaimed multi-volume *Americans and the California*

Dream is an unparalleled work of cultural history. In this volume, Starr covers the crucial postwar period--1950 to 1963--when the California we know today first burst into prominence. Starr brilliantly illuminates the dominant economic, social, and cultural forces in California in these pivotal years. In a powerful blend of telling events, colorful personalities, and insightful analyses, Starr examines such issues as the overnight creation of the postwar California suburb, the rise of Los Angeles as Super City, the reluctant emergence of San Diego as one of the largest cities in the nation, and the decline of political centrism. He explores the Silent Generation and the emergent Boomer youth cult, the Beats and the Hollywood "Rat Pack," the pervasive influence of Zen Buddhism and other Asian traditions in art and design, the rise of the University of California and the emergence of California itself as a utopia of higher education, the cooling of West Coast jazz, freeway and water projects of heroic magnitude, outdoor life and the beginnings of the environmental movement. More broadly, he shows how California not only became the most populous state in the Union, but in fact evolved into a mega-state en route to becoming the global commonwealth it is today. *Golden Dreams* continues an epic series that has been widely recognized for its signal contribution to the history of American culture in California. It is a book that transcends its stated subject to offer a wealth of insight into the growth of the Sun Belt and the West and

indeed the dramatic transformation of America itself in these pivotal years following the Second World War.

Mini Oct 03 2020 Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last and 5,387,862nd original Mini rolled off the production line in October, 2000. In July 2001,

BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as popular as the original from 1959.

Lemon-Aid New Cars and Trucks 2012 Mar 08 2021 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain

leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea

From the Race Shop Floor Jun 30 2020 This is the inside story of how motorcycle race team of the 'forties worked. How a division in the company's outlook drove it to bankruptcy. The story of how a member of the racing team saw it all. How he participated in racing, and devised a new machine, but was swept aside. How he emigrated, and tried to get a factory to embrace a new world view but was frustrated again. Lessons that Detroit might heed. How he

moved into an academic program, and aided the US Air Force in its search for lower costs.

Extinct at Last Jun 11 2021 This book represents at least to Robert Clarke what every red-blooded Canadian boy should have been doing in the 50's and 60's, that is "getting some". He has no time for contemporaries who did the "right thing" and then went home moaning with bulging trousers, not a bit of it. Robert was a disgusting boy and not unsurprisingly to his father became an even more disgusting old man as he writes

revealingly in his only now published diary. Poor Robert had always assumed that his ravings would only see the light of day some hundred years after his passing, but due to unforeseen events the light of day is now. The old roue must be spinning in his grave with embarrassment as most of his players (now victims) are still with us and very much running for cover. Even in death Robert Clarke continues to romp haphazardly over the deep sensitivities of "Old Toronto" with many distinguished matrons now unable to show themselves in public due to "alleged" youthful moments with young Robert. Sadly for Toronto there is the very ugly rumour of further diaries from the very spotted hand of Robert Clarke Esq to come!!
