Magnetic Resonance Scanning and Epilepsy Oct 27 2022 It was only in 1980 that the first recognisable magnetic resonance images of the human brain were published, by Moore and Holland from Nottingham University in England. There then followed a number of clinical trials of brain imaging, the most notable from the Hammersmith Hospital in London using a system designed by EMI, the original manufacturers of the first CT machines. A true revolution in medicine has ensued; in only a few years there are thousands of scanning units, and magnetic resonance imaging (MRI) has assumed a central importance in medical investigation. It is an extraordinary fact that within a few years of development, the esoteric physics of nuclear spin, angular momentum, and magnetic vector precession were harnessed to provide exquisite images of living anatomy; modern science has no greater tribute. That indisputable king of neurology and the oldest of recorded conditions, epilepsy, has not been untouched by the new technology; indeed, it is our view that the introduction of MRI of electroencephalography (EEG) in the late 1930s has been as important to epilepsy as was that of the 1930s. Now, for the first time, the structural and aetiological basis of the condition is susceptible to thorough investigation, and MRI can provide structural detail to parallel the functional detail of EEG. MRI has the same potential as had EEG over 50 years ago, to provide a new level of understanding of the basic mechanisms, the clinical features and the treatment of epilepsy.

Raising Lazarus Apr 21 2022 Raising Lazarus is Dr. Robert Pensack's personal memoir of his battle to maintain his sanity in the face of extraordinary suffering. Dr. Pensack's story chronicles his near life-long struggle with a mortal illness, Hypertrophic Cardiomyopathy, or HCM (formally known as IHSS), a genetic illness marked by abnormality of the heart muscle. After the disease claimed the life of his young mother, the adolescent Pensack--and his brother Richard, who also suffered from HCM--went on to become chronic-research heart patients at The National Institutes of Health in Bethesda, Maryland. They

endured a litany of surgeries and multiple near-death experiences caused by cardiac arrests until, thirty years later, both received heart transplants that saved their lives. Remarkably--and coincidentally--Dr. Pensack played a vital role in the evolution of organ transplantation and in his own survival, helping to produce one of the anti-rejection drugs with which he himself was later treated at the time of his greatest need. From recounting his feeling of being condemned to an existence laden with insufferable burden to the hope restored through the ultimate gift of life, *Raising Lazarus* is Dr. Pensack's inspirational story of survival and triumph. "Extraordinary...A doctor's memoir of his struggle against his own illness...An intimate account of the remarkable medical advances of the last few decades from [a] unique point of view."--New York Times Book Review

**Growing Up at Grossinger's** Aug 21 2019 "To be devoured in one non-stop gulp...fascinating reading."—The New York Post From 1919 to 1986, Grossinger's Catskill Resort Hotel provided a summer retreat from the city heat for New York's Jews, and entertained the great, the near-great, and the not so great, Jews and Gentiles alike. A melting pot of the Borscht Belt, sports, and show-biz worlds, loyal visitors included Red Buttons, Rocky Marciano, Eddie Fisher, and Jackie Robinson. Tania Grossinger grew up there. In her fascinating insider's account of life in the hospitality industry, she sheds light on how hotel children keep up with the frenetic pace of life, and how they come to grips with the outside world (which intrudes now and again), sex (happening in every room), and, occasionally, their intellectual interests. *Growing Up at Grossinger's* is both a wonderful coming-of-age story and a sentimental reading of a chapter of the Jewish experience in America that has now closed. 25 b/w photographs. **Shine With Me: A With Me In Seattle Novella** Apr 09 2021 From New York Times and USA Today bestselling author Kristen Proby comes a new story in her With Me In Seattle series... Sabrina Harrison hates being famous. She walked away from show business, from the flashing bulbs and prying eyes years ago, and is happy in her rural Oregon home, dedicating her life to her non-profit. Until Hollywood calls, offering her the role of a lifetime. In more than ten years, she's never felt the pull to return to the business that shunned her, but this role is everything Sabrina's ever longed for. Now she has to get in shape for it. Benjamin Demarco's gym, Sound Fitness, continues making a name for itself in Seattle. And now, he finds himself with the task of training Sabrina, getting her in shape for the role of her life. He's trained hundreds of women. This is his job. So why does he suddenly see Sabrina as more than just another client? His hands linger on her skin, his breath catches when she's near. He knows better. Soon, she'll be gone, living her life. A life that doesn't include him. \*\*Every 1001 Dark Nights novella is a standalone story. For new readers, it's an introduction to an author's world. And for fans, it's a bonus book in the author's series. We hope you'll enjoy each one as much as we do.\*\*
