With Answers. In last few years the information we are supposed to provide in our answers to score high marks in anthropology has gone beyond the information given in the conventional study materials. So, in the interest of students with Anthropology as an optional we have worked hard to give information in a manner which can help you in writing answers in that manner. This book gives you answer to each question asked since 2010 to 2019 by using previous year question papers of anthropology. I sincerely believe that this approach will add to your preparation on anthropology and it will supplement your available study materials through the dynamic content of our answers. The language used in the book is simple and tries to build anthropological approach in the views and answer writing of students; helping students with non-anthropological background to develop anthropological views. I thank Team ARSu for improving the quality and reach of the book significantly. Special Features: Detailed answers for Civil Services (Main) Examination (ANTHROPOLOGY 2010-2019). This book is an extension of the author's basic book on Structural Analysis. The initial three chapters review the basic concepts in structural analysis and matrix algebra, and show how the latter provides an excellent mathematical framework for the former. The next three chapters discuss in detail and demonstrate through many examples how matrix methods can be applied to linear static analysis of skeletal structures (plane and space trusses; beams and grids; plane and space frames) by the stiffness method. Also, it is shown how simple structures can be conveniently solved using a reduced stiffness formulation, involving far less computational effort. The flexibility method is also discussed. Finally, in the seventh chapter, analysis of elastic instability and second-order response is discussed in detail. The main objective is to enable the student to have a good grasp of all the

fundamental issues in these advanced topics in Structural Analysis, besides enjoying the learning process, and developing analytical and intuitive skills. With these strong fundamentals, the student will be well prepared to explore and understand further topics like Finite Elements Analysis. This book contains model answers to the questions and case studies asked in General Studies-IV (GS-4) Civil Services Mains Paper from 2013 to 2019 with detailed information on the background/framework of the question/likely answer. It is important to note that as a subject in Civil Services Examination, GS-4 is the only subject where we have comparatively well defined syllabus and paper pattern. Because of this, each individual can score good marks in the paper with lesser efforts as compared to other General Studies Papers, i.e. if you dedicate 15-20 days to this subject, you will not just learn about the complete subject but you can score much more as compared to other General Studies paper, as they require much more time because of their dynamic nature. If we consider the previous year

question Papers of General Studies-IV, the questions were divided into two parts as: 1. Theory-based Questions (based on the theoretical aspects of the ethics), and 2. Case Studies (based on the actual or probable life situations). The answers are divided into two portions with first one detailing about the framework of the answer or background of the question, giving details about the basic idea of the question or the form of case study. The second part is the model answer giving wider inputs on the question. We hope that wider considerations will help the reader in understanding the question and how to structure the answer, based on the question. Thousands of students write the GATE Paper annually.
