On Liberty and Other Essays Mar 26 2020 Collected here in a single volume for the first time, On Liberty, Utilitarianism, Considerations on Representative Government, and The Subjection of Women show Mill applying his liberal utilitarian philosophy to a range of issues that remain vital today - issues of the nature of ethics, the scope and limits of individual liberty, the merits of and costs of democratic government, and the place of women in society. In his Introduction John Gray describes these essays as applications of Mill's doctrine of the Art of Life, as set out in A System of Logic. Using the resources of recent revisionist scholarship, he shows Mill's work to be far richer and subtler than traditional interpretations allow. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading

Exploring Language Variation, Diversity and Change Aug 19 2019 While communication is becoming increasingly multimodal, verbal language and its use in different communicative situations still hold centre-stage in many research circles. The articles in this book explore native and second languages from three vantage points: syntactic structure, their uses in professional settings, and second/foreign language pedagogy. Using different methods and methodologies, the contributions here draw on both theoretical and empirical data in order to investigate a series of language-internal and language-external factors that both account for the structural peculiarities of Romanian and English, and have a bearing on its translatability and learnability by students of English as a second language. Featuring the hands-on experience of teachers and learners in the Romanian context, this volume provides useful insights and illustrative examples of relevance to theorists and practitioners in language and communication-related fields.

The Heart of the Matter Apr 07 2021 Psychiatrist and Holocaust survivor Viktor Frankl said, "Man's search for meaning is the primary motivation in his life." Yet some

contemporary voices claim that increased knowledge of the material world must diminish our sense of meaning. Physicist Steven Weinberg said, "The more the universe seems comprehensible, the more it also seems pointless." Many people hold the material and meaningful perspectives separate in their minds, in a state of uneasy truce. *The Heart of the Matter: A Case for Meaning in a Material World* tells us that this split vision is not necessary, and shows us how the two views can be harmonized to give depth to our picture of the world. It looks at current scientific observations from astronomy, biology and physics, as well as insights from mathematics, philosophy, psychology and religion. We are left with a sense of wonder at both the mechanics and the values of the world, the "how" and the "why" of events. This book will appeal to everyone fascinated by how our world works, and especially to those who wonder how such marvelous mechanisms can leave room for the values and purpose that give meaning to our lives, and to our world.

Motivation and Learning Strategies for College Success
Dec 03 2020 This popular text combines theory, research, and applications to teach college students how to become more self-regulated learners. Study skills are treated as a serious academic course of study. Students learn about human motivation and learning as they improve their study skills. On Liberty, Utilitarianism and Other Essays Feb 23 2020 'it is only the cultivation of individuality which produces, or can produce, well developed human beings' Mill's four essays, 'On Liberty', 'Utilitarianism', 'Considerations on Representative Government', and 'The Subjection of Women' examine the most central issues that face liberal

democratic regimes - whether in the nineteenth century or the twenty-first. They have formed the basis for many of the political institutions of the West since the late nineteenth century, tackling as they do the appropriate grounds for protecting individual liberty, the basic principles of ethics, the benefits and the costs of representative institutions, and the central importance of gender equality in society. These essays are central to the liberal tradition, but their interpretation and how we should understand their connection with each other are both contentious. In their introduction Mark Philp and Frederick Rosen set the essays in the context of Mill's other works, and argue that his conviction in the importance of the development of human character in its full diversity provides the core to his liberalism and to any defensible account of the value of liberalism to the modern world. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. MRCOG II Short Essay Questions Aug 11 2021 MRCOG Short Essay Questions is the essential aid for all trainees studying for the membership examination of the Royal College of Obstetricians and Gynaecologists. This book contains 150 short essay questions, clearly structured to facilitate both learning and practice. Questions are divided primarily into obstetrics and gynaecology and secondly by main topics such as infertility, operative gynaecology and antenatal care. The answers are written in the form of bullet points; a format that not only clearly identifies the key points but also emulates the structure of the model answers given to the examiners by the RCOG. Khaldoun Sharif is a consultant in obstetrics and gynaecology at the Birmingham Women's Hospital, and has a proven track record as an author of MRCOG revision books. His co-author, Parveen Abedin recently passed the examination and has therefore provided invaluable insights that have ensured the content is both appropriate and up-to-date.

The Music History Classroom Dec 15 2021 The Music History Classroom brings together essays written by recognized and experienced teachers to assist in the design, implementation, and revision of college-level music history courses. This includes the traditional music history survey for music majors, but the materials

presented here are applicable to other music history courses for music majors and general education students alike, including period classes, composer or repertory courses, and special topics classes and seminars. The authors bring current thought on the scholarship of teaching and learning together with practical experience into the unique environment of the music history classroom. While many of the issues confronting teachers in other disciplines are pertinent to music history classes, this collection addresses the unique nature of musical materials and the challenges involved in negotiating between historical information, complex technical musical issues, and the aesthetics of performing and listening. This single volume provides a systematic outline of practical teaching advice on all facets of music history pedagogy, including course design, classroom technology, listening and writing assignments, and more. The Music History Classroom presents the 'nuts-and-bolts' of teaching music history suitable for graduate students, junior faculty, and seasoned teachers alike.
