**Firstborn** Jul 28 2022 Two of the biggest names in SF together again, with the third of the acclaimed Time's Odyssey sequence. With this epic tale of altered histories and different earths, a universe where Alexander's empire prompted a different past, a world where strange alien 'eyes' gaze upon a fractured reality, a time when man is looking to colonise the red planet, Arthur C. Clarke and Stephen Baxter scale new heights of ambition and sheer story telling brio. This is classic SF adventure from two of the biggest names in the genre. A heady combination of high concept SF, big engineering projects and human drama.

[Analytical Philosophy of Action](#) Aug 05 2020 A study of the philosophical problems associated with the concept of action. Professor Danto is concerned to isolate logically the notion of a 'basic action' and to examine the way in which context and intention, for example, can convert physiological movements into significant actions. He finds many suggestive parallels between the concepts - the logical architecture - of action and cognition and in developing this theme he becomes involved in and proposes new approaches to various long-standing problems connected with causality, determinism and materialism. As in his earlier books, *Analytical Philosophy of History* and *Analytical Philosophy of Knowledge*, Professor Danto places the discussion in a broad historical and philosophical perspective and brings to it a wide reading and an unusual range of interests. He is always prepared to venture novel ideas to stimulate further debate and research and the book as a whole is presented as an original contribution to a subject which is attracting increasing attention from philosophers and from psychologists with an interest in the conceptual assumptions behind their work.

**Arthur C. Clarke** Sep 29 2022 A critical assessment of the novels and short stories of Arthur C. Clarke, presented with a brief biographical sketch, highlights his contributions to science fiction and his impact on literature in general.

**The Garden of Rama** Jan 02 2023 In the spellbinding Arthur C. Clarke tradition, here is an exhilarating adventure into the hearts of both the Universe and mankind . . . By the twenty-third century Earth has already had two encounters with massive, mysterious robotic spacecraft from beyond our solar system—the incontestable proof of an alien technology that far exceeds our own. Now three human cosmonauts are trapped aboard a labyrinthine Raman vessel, where it will take all of their physical and mental resources to survive. Only twelve years into their journey do these intrepid travelers learn their destination and face their ultimate challenge: a rendezvous with a Raman base—and the unseen architects of their galactic home. The cosmonauts have given up family, friends, and possessions to live a new kind of life. But the answers that await them at the Raman Node will require an even greater sacrifice—if humanity is indeed ready to learn the awe-inspiring truth.

The Last Theorem Nov 27 2019 Two of science fiction's most renowned writers join forces for a storytelling sensation. The historic collaboration between Frederik Pohl and his fellow founding father of the genre, Arthur C. Clarke, is both a momentous literary event and a fittingly grand farewell from the late, great visionary author of *2001: A Space Odyssey*. The Last Theorem is a story of one man's mathematical obsession, and a celebration of the human spirit and the scientific method. It is also a gripping intellectual thriller in which humanity, facing extermination from all-but-omnipotent aliens, the Grand Galactics, must overcome differences of politics and religion and come together . . . or perish. In 1637, the French mathematician Pierre de Fermat scrawled a note in the margin of a book about an enigmatic theorem: "I have discovered a truly marvelous proof of this proposition which this margin is too narrow to contain." He also neglected to record his proof elsewhere. Thus began a search for the Holy Grail of mathematics—a search that didn't end until 1994, when Andrew Wiles published a 150-page proof. But the proof was burdensome, overlong, and utilized mathematical techniques undreamed of in Fermat's time, and so it left many critics unsatisfied—including young Ranjit Subramanian, a Sri Lankan with a special gift for mathematics and a passion for the famous "Last Theorem." When Ranjit writes a three-page proof of the theorem that relies exclusively on knowledge available to Fermat, his achievement is hailed as a work of genius, bringing him fame and fortune. But it also brings him to the attention of the National Security Agency and a shadowy United Nations outfit called Pax per Fidem, or Peace Through Transparency, whose secretive workings belie its name. Suddenly Ranjit—together with his wife, Myra de Soyza, an expert in artificial intelligence, and their burgeoning family—finds himself swept up in world-shaking events, his genius for abstract mathematical thought put to uses that are both concrete and potentially deadly. Meanwhile, unbeknownst to anyone on Earth, an alien fleet is approaching the planet at a significant percentage of the speed of light. Their mission: to exterminate the dangerous species of primates known as homo sapiens.

*3001* Aug 29 2022 The mysteries of the monoliths are revealed in this inspired conclusion to the Hugo Award-winning Space Odyssey series—"there are marvels aplenty" (The New York Times). On an ill-fated mission to Jupiter in 2001, the mutinous supercomputer HAL sent crewmembers David Bowman and Frank Poole into the frozen void of space. Bowman's strange transformation into a Star Child is traced through the novels 2010 and 2061. But now, a thousand years after his death, Frank Poole is brought back to life—and thrust into a world far more technically advanced than the one he left behind. Poole discovers a world of human minds interfacing directly with computers, genetically engineered dinosaur servants, and massive space elevators built around the equator. He also discovers an impending threat to humanity lurking within the enigmatic monoliths. To fight it, Poole must join forces with Bowman and HAL, now fused into one corporeal consciousness—and the only being with the power to thwart the monoliths' mysterious creators. "3001 is not just a page-turner, plugged in to the great icons of HAL and the monoliths, but a book of wisdom too, pithy and provocative." —New Scientist

**Arthur C. Clarke's July 20, 2019** Jun 14 2021 A science fiction writer offers a glimpse of life in the twenty-first century with a visit to a law office run by computer, to baseball pitchers with bionic implants throwing 120-mph fastballs

Rama Revealed Dec 21 2021 Years after the appearance in the solar system of the immense, deserted spaceship named by its discoverers Rama, a second craft arrived, destined to become home for a group of human colonists. But now the colony has become a brutal dictatorship, committing genocide against its peaceful alien neighbours and terrorizing its own inhabitants. Nicole Wakefield, condemned to death for treason, has escaped and crossed the Cylindrical Sea to the island of mysterious skyscrapers which the humans call New York. There she is reunited with her husband, and soon they are joined by others of their family and friends. But pursuit is not far behind and they are forced to flee to the subterranean corridors of New York inhabited by the menacing octospiders.

**The SF Book of Lists** May 14 2021 Collects lists of a wide range of facts and trivia concerning science fiction and fantasy authors and their writings

Register of the Commissioned Officers, Cadets, Midshipmen, and Warrant Officers of the United States Naval Reserve Jul 04 2020

**How the World Was One** Sep 17 2021 Arthur C. Clarke has been one of the most influential commentators on - and prophets of

- the communications technology which has created the global village. Now, drawing partly on his own sometimes very personal writings, he provides an absorbing history and survey of modern communications. The story begins with the titanic struggles to lay transatlantic telegraph cables in the nineteenth century. Fighting against widespread scepticism, lack of funds, technical disasters and setbacks - and against the Atlantic itself, above and below the surface - the pioneers achieved the seemingly impossible and by 1858 Britain and America were linked by Telegraph. Nearly a century later, as the first transatlantic telephone cable was being laid, the technology that would rival and perhaps even supersede it was undergoing its painful birth as scientists developed the communications satellite precisely as Clarke first described in his famous 1945 article *Wireless World*, 'Extra-terrestrial Relays', reprinted in this book. The rivalry between cable and satellite continued through the decades. Communication satellites (Comsats) performed even beyond the most optimistic expectations, but cable fought back with the development of the transistor. Then, in one of the most dramatic and unexpected breakthroughs in any technology, the potential of cable systems was transformed. The development of fibre optics technology meant that once more the seabeds of the world began to be draped with the newest and most sophisticated artefacts of human engineering. It is an enthralling story, filled with extraordinary events and people, and Arthur C. Clarke brings all his storytelling flair and scientific expertise to bear on it. The result is a superb combination of history, comment and challenging speculation.

Rama II Jun 26 2022 In the sequel to "Rendezvous with Rama," a second Raman spacecraft is discovered approaching Earth in 2196, an event of potentially devastating consequences for humankind

**Report on Planet Three** Dec 01 2022 In addition to being one of Science Fiction's greatest writers, Sir Arthur C. Clarke was also one of our foremost thinkers and visionaries, producing a number of highly readable and important non-fiction works. Report of Planet Three is a collection of 23 essays on the future of Man and his technology, including essays on space, satellite communications, the internet, alien contact, UFO debunking and relativity.
