Allusions and Reflections Dec 26 2019 In June 2012, scholars from a number of disciplines and countries gathered in Stockholm to discuss the representation of ancient mythology in Renaissance Europe. This symposium was an opportunity for the participants to cross disciplinary borders and to problematize a well-researched field. The aim was to move beyond a view of mythology as mere propaganda in order to promote an understanding of ancient tales and fables as contemporary means to explain and comprehend the Early Modern world. W ...

Credo Mar 21 2022 What do you call this? My grandfather kept it in his pocket, taking it out only at dinner. I own one too. More emblem than tool really, but I love the way it answers my grip, perfectly weighted, light, the small crook of its handle hugging my pinky, the blade curved like the C of my own name, so that whatever I need to cut, I need to cut towards me, my thumb steadying the object, then a surgical half-sweep my grandfather used to shear away a bit of cheese, a chunk of bread, or to divvy up a peach, piling the pieces in his glass of red wine. And me, what do I use it for? To sharpen my pencil. Its crescent tooth bites into the wood, moving oh so quick and deep, this doohicky sickle, this whatsit scythe. Rongetta. Ron-get-ta.

The Ultimate Sniper Dec 18 2021 Through revised text, new photos, specialised illustrations, updated charts and additional information sidebars, *The Ultimate Sniper* once again thoroughly details the three great skill areas of sniping; marksmanship, fieldcraft and tactics.

Donny's Unauthorized Technical Guide to Harley Davidson 1936 to Present Oct 28 2022 Donny is the Winner of the 2012 International Book Awards. Donny Petersen offers the real deal in performancing your Harley-Davidson Twin Cam. Graphics, pictures, and charts guide the

reader on a sure-footed journey to a thorough H-D Twin Cam performance understanding. Petersen's insight makes technical issues understandable even for the novice. Donny simply explains what unfailingly works in performing the Twin Cam. This is the second volume of Petersen's long-awaited Donny's Unauthorized Technical Guide to Harley Davidson 1936 to Present. This twelve-volume series by the dean of motorcycle technology examines the theory, design, and practical aspects of Twin Cam performance. Donny studied privately with Harley-Davidson engineers, having worked on Harleys for over 35 years. He founded Toronto's Heavy Duty Cycles in 1974, North America's premier motorcycle shop. Donny has ridden hundreds of performed Shovels, Evos, and Twin Cams across four continents doing all of his own roadside repairs. He has acquired his practical knowledge the hard way. Donny has the privilege of sharing his performance secrets the easy way. Donny will walk you through detailed performing procedures like headwork, turbo-supercharging, nitrous, big-inch Harleys and completing simple hop-up procedures like air breathers, exhausts, and ignition modifications. Donny Petersen feels honored to share the wealth of his motorcycle knowledge and technical expertise.

Eating Disorders and Obesity Nov 24 2019 Eating Disorders have traditionally been considered apart from public health concerns about increasing obesity. It is evident that these problems are, however, related in important ways. Comorbid obesity and eating disorder is increasing at a faster rate than either obesity or eating disorders alone and one in five people with obesity also presents with an Eating Disorder, commonly but not limited to Binge Eating Disorder. New disorders have emerged such as normal weight or Atypical Anorexia Nervosa. However research and practice too often occurs in parallel with a failure to understand the weight disorder spectrum and consequences of co-morbidity that then contributes to poorer outcomes for people living with a larger size and an Eating Disorder. Urgently needed are trials that will inform more effective assessment, treatment and care where body size and eating disorder symptoms are both key to the research question.

The Sumerians Jan 27 2020 The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—*American Journal of Archaeology* "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—*Library Journal*

Popular Science Sep 27 2022 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Dare to Lead Feb 26 2020 In her #1 NYT bestsellers, Brené Brown taught us what it means to dare greatly, rise strong and brave the wilderness. Now, based on new research conducted with leaders, change makers and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Leadership is not about titles, status and power over people. Leaders are people who hold themselves accountable for recognising the potential in people and ideas, and developing that potential. This is a book for everyone who is ready to

choose courage over comfort, make a difference and lead. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it and work to align authority and accountability. We don't avoid difficult conversations and situations; we lean into the vulnerability that's necessary to do good work. But daring leadership in a culture that's defined by scarcity, fear and uncertainty requires building courage skills, which are uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the same time we're scrambling to figure out what we have to offer that machines can't do better and faster. What can we do better? Empathy, connection and courage to start. Brené Brown spent the past two decades researching the emotions that give meaning to our lives. Over the past seven years, she found that leaders in organisations ranging from small entrepreneurial start-ups and family-owned businesses to non-profits, civic organisations and Fortune 50 companies, are asking the same questions: How do you cultivate braver, more daring leaders? And, how do you embed the value of courage in your culture? *Dare to Lead* answers these questions and gives us actionable strategies and real examples from her new research-based, courage-building programme. Brené writes, 'One of the most important findings of my career is that courage can be taught, developed and measured. Courage is a collection of four skill sets supported by twenty-eight behaviours. All it requires is a commitment to doing bold work, having tough conversations and showing up with our whole hearts. Easy? No. Choosing courage over comfort is not easy. Worth it? Always. We want to be brave with our lives and work. It's why we're here.'

investment trusts, real estate, finance and credit companies (1928-54)
A Soviet Credo Aug 26 2022 In this book, Pauline Fairclough tackles one of the most significant and least understood of Shostakovich's major works. She argues that the Fourth Symphony was radically different from its Soviet contemporaries in terms of its structure, dramaturgy, tone and even language, and therefore challenged the norms of Soviet symphonism at a crucial stage of its development. Fairclough

meticulously examines the score to inform a discussion of tonal and thematic processes, allusion, paraphrase and reference to musical types, or intonations. Such analysis is set deeply in the context of Soviet musical culture during the period 1932-6.
