Now that the third Yugoslavia has ended and the new union of Serbia and Montenegro emerged, Montenegro still remains largely unknown. The path of this smallest republic of former Yugoslavia has differed from the rest of the country during the past decade. Montenegro emerged as the only republic not to be engulfed in armed conflict. At the same time, it remained together with Serbia part of the Federal Republic of Yugoslavia and will continue to form a loose union with Serbia for the coming three years. This book seeks to close an important gap in the literature on the former Yugoslavia. As the first overview over political, historical, and economic developments in Montenegro during the past decade in English, it seeks to offer a nuanced assessment of the difficulties encountered by Montenegro during the violent disintegration of Yugoslavia. The articles cover all major aspects for understanding contemporary Montenegro; from its historical origins and the identity of Montenegrin to political, economic developments and an overview of minority-majority relations. In addition, the book surveys the dispute over Montenegrin independence and the Belgrade agreement of March

2002. The book is not only of interest for those seeking to understand contemporary Montenegro, but also for scholars and students interested in the dissolution of Yugoslavia and the conflicts and post-war transition in which the former Yugoslav space is engaged. Why do early films present the Netherlands as a country full of canals and windmills, where people wear traditional costumes and wooden shoes, while industries and modern urban life are all but absent? Images of Dutchness investigates the roots of this visual repertoire from diverse sources, ranging from magazines to tourist brochures, from anthropological treatises to advertising trade cards, stereoscopic photographs, picture postcards, magic lantern slide sets and films of early cinema. This richly illustrated book provides an in-depth study of the fascinating corpus of popular visual media and their written comments that are studied for the first time. Through the combined analysis of words and images, the author identifies not only what has been considered "typically Dutch" in the long nineteenth century, but also provides new insights into the logic and emergence of national clichés in the Western world. The ancient tales and distant origins of Christmas and its' traditions have long been of very little interest to the right thinking. This book seeks to arm the know it all, the boor, the acid tempered and other social miscreants with information designed to harass the sensibilities of the more balanced celebrants of Christmas. Early scorn for Vinsons Christmas: And Other Oddities. A work of utter madness. : The London Chronicle An inelegant assortment of claptrap, poppycock, balderdash and rubbish with the aftertaste of an ill stored cod. : Lloyds Illustrated Newspaper Repellent tripe of the first order. a tome so vile as to shame Gutenberg himself. : The Hull Packet 'I know no place where firm and paternal government would sooner produce beneficial results than in the Solomons ... Here is an object worthy indeed the devotion of one's life'. Charles Morris Woodford devoted his working life to pursuing this dream, becoming the first British Resident Commissioner in 1897 and remaining in office until 1915, establishing the colonial state almost singlehandedly. His career in the Pacific extended beyond the Solomon Islands. He worked briefly for the Western Pacific High Commission in Fiji, was a temporary consul in

Samoa, and travelled as a Government Agent on a small labour vessel returning indentured workers to the Gilbert Islands. As an independent naturalist he made three successful expeditions to the islands, and even climbed Mt Popomanaseu, the highest mountain in Guadalcanal. However, his natural history collection of over 20,000 specimens, held by the British Museum of Natural History, has not been comprehensively examined. The British Solomon Islands Protectorate was established in order to control the Pacific Labour Trade and to counter possible expansion by French and German colonialists. It remaining an impoverished, largely neglected protectorate in the Western Pacific whose economic importance was large-scale copra production, with its copra considered the second-worst in the world. This book is a study of Woodford, the man, and what drove his desire to establish a colonial protectorate in the Solomon Islands. In doing so, it also addresses ongoing issues: not so much why the independent state broke down, but how imperfectly it was put together in the first place. ""Buku genre lucu sudah banyak. (Gw, Arham Kendari)"" Malaita is one of the major islands in the Solomons Archipelago and has the largest population in the Solomon Islands nation. Its people have an undeserved reputation for conservatism and aggression. Making Mala argues that in essence Malaitans are no different from other Solomon Islanders, and that their dominance, both in numbers and their place in the modern nation, can be explained through their recent history. A grounding theme of the book is its argument that, far than being conservative, Malaitan religions and cultures have always been adaptable and have proved remarkably flexible in accommodating change. This has been the secret of Malaitan success. Malaitans rocked the foundations of the British protectorate during the protonationalist Maasina Rule movement in the 1940s and the early 1950s, have heavily engaged in internal migration, particularly to urban areas, and were central to the 'Tension Years' between 1998 and 2003. Making Mala reassesses Malaita's history, demolishes undeserved tropes and uses historical and cultural analyses to explain Malaitans' place in the Solomon Islands nation today. This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia (NEA), defined as the region north of the Yellow River and east of the Yenisei. In particular, it analyzes what is called the grammar of questions (GQ), i.e., those aspects of any given language that are specialized for asking questions or regularly combine with these. The bulk of the study is a bottom-up description and comparison of GQs in

the languages of NEA. The addition of the phrase and beyond to the title of this study serves two purposes. First, languages such as Turkish and Chuvash are included, despite the fact that they are spoken outside of NEA, since they have ties to (or even originated in) the region. Second, despite its focus on one area, the typology is intended to be applicable to other languages as well. Therefore, it makes extensive use of data from languages outside of NEA. The restriction to one category is necessary for reasons of space and clarity, and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology. The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples. The aim is to achieve both a cross-linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia. Taking an interdisciplinary approach, the authors invaluablely pinpoint both overarching problems and possibilities associated with the social dimension of European integration. Prominent researchers of economics, law and political science tackle this complex issue, providing new solutions within their respective fields of expertise. Illustrating the importance of cohesion, this book is vital for those interested in comparative European studies, from backgrounds in public and social policy, law and economics.

6.903 Mil berkisah tentang momenmomen penting konser Noah di 2 benua 5 negara dalam 1 hari pada 16 September 2012. Sempat tertunda dua tahun karena Ariel harus mendekam di bui, konser ini menorehkan rekor Muri. Ketegangan dan kekonyolan berpilin menjadi satu narasi. Ditulis dengan gaya catatan harian, buku membawa pada suasana persiapan dan jalannya konser. Ketidakpastian izin Ariel karena masih berstatus bebas bersyarat, rumitnya mengurus visa di Australia, David yang mesti rajin minum obat, atau Ariel yang menolak memotong lagu di tengah konser adalah sebagian dari ilustrasi.

6.903 Mil mendedahkan seManga, Manhua & Manhwa, keyakinan, dan kerja keras personel Noah dalam meraih mimpi. "Jangan pernah berhenti untuk bermimpi, jangan pernah berhenti untuk berharap, jangan pernah berhenti untuk berusaha selama napas masih ada. Yang terjadi hari ini, rekor ini, tercipta bukan untuk kami,

melainkan untuk Sahabat semua." -Ariel "Sukses konser di Jakarta merupakan bukti bagi suara-suara yang menyatakan Noah tidak bisa mengulang sukses Peterpan. Saya percaya bahwa jika Noah punya kepercayaan diri, kami bisa melakukan lebih dari yang pernah dicapai Peterpan." -Uki "Tur ke lima negara ibarat study tour di masa SMA, tapi kali ini ke luar negeri. Tentu exciting sekali.... Semua merasa aman karena sekarang ada vokalisnya. Kalau kemarin pas konser Suara Lainnya, itu baru deg-degan karena nggak ada Ariel." -Lukman "Sukses konser ini adalah kesempatan kedua yang dikasih sama Allah. Coba bayangin, kami pernah dihujat-hujat oleh masyarakat kecil sampai masyarakat atas. Benar, ini kesempatan yang diberikan oleh Allah. Saya tidak tahu sampai kapan." -Reza "Dalam sepiunya malam itu, tanpa voorijder, tanpa tepuk tangan di jalanan, nobody knows siapa yang ada di dalam mobil. Kami kembali menjadi orang biasa." -David

This book studies the intimate tensions between affect and emotions as terrains of sociopolitical significance in the cinema of Lucrecia Martel, Albertina Carri, and Lucía Puenzo. Such tensions, Selimović argues, result in "affective moments" that relate to the films' core arguments. They also signal these filmmakers' novel insights on complex manifestations of memory, desire, and violence. The chapters explore how the presence of pronounced—but reticent—affect complicates emotional bonding in the everydayness depicted in these films. By bringing out moments of affect in these filmmakers' diegetic worlds, this book traces the ways in which subtle foci on gender, class, race, and sexuality correlate in these Argentine women's films. Combining anthropological methods and theories with political philosophy, Sian Lazar analyzes everyday practices and experiences of citizenship in a satellite city to the Bolivian capital of La Paz: El Alto, where more than three-quarters of the population identify as indigenous Aymara. For several years, El Alto has been at the heart of resistance to neoliberal market reforms, such as the export of natural resources and the privatization of public water systems. In October 2003, protests centered in El Alto forced the Bolivian president to resign; in December 2005, the country's first indigenous president, Evo Morales, was elected. The growth of a strong social justice movement in Bolivia has caught the imagination of scholars and political activists worldwide. El Alto remains crucial to this ongoing process. In *El Alto, Rebel City* Lazar examines the values, practices, and conflicts behind the astonishing political power exercised by El Alto citizens in the twenty-first century. Drawing on ethnographic fieldwork conducted between 1997 and 2004, Lazar contends that in El Alto, citizenship is a set of practices defined by one's participation in a range of associations, many of them collectivist in nature. Her argument challenges Western liberal notions of the citizen by suggesting that citizenship is not only individual and national but in many ways communitarian and distinctly local, constituted through different kinds of affiliations. Since in El Alto these affiliations most often emerge through people's place of residence and their occupational ties, Lazar offers in-depth analyses of neighborhood associations and trade unions. In so doing, she describes how the city's various collectivities mediate between the state and the individual. Collective organization in El Alto and the concept of citizenship underlying it are worthy of attention; they are the basis of the city's formidable power to mobilize popular protest. It started with the USA TODAY bestseller *If I Run*, continued in *If I'm Found*, and now Casey

Cox's story reaches a thrilling conclusion in *If I Live*. This book is a celebration. It praises the many innovative aspects of Irina Sandomirskaja's contributions to a variety of fields in the humanities and Slavic studies, in particular through the numerous colleagues who mirror the impact of her work in their own research and thought. As such, this celebration is also an expression of academic gratitude and a gesture of friendship. Internationally renowned essayist and cultural commentator Ilan Stavans spent five years traveling from across a dozen countries in Latin America, in search of what defines the Jewish communities in the region, whose roots date back to Christopher Columbus's arrival. In the tradition of V.S. Naipaul's explorations of India, the Caribbean, and the Arab World, he came back with an extraordinarily vivid travelogue. Stavans talks to families of the *desaparecidos* in Buenos Aires, to "Indian Jews," and to people affiliated with neo-Nazi groups in Patagonia. He also visits Spain to understand the long-term effects of the Inquisition, the American Southwest habitat of "secret Jews," and Israel, where immigrants from Latin America have reshaped the Jewish state. Along the way, he looks for the proverbial "seventh heaven," which, according to the Talmud, out of proximity with the divine, the meaning of life in general, and Jewish life in particular, becomes clearer. *The Seventh Heaven* is a masterful work in Stavans's ongoing quest to find a convergence between the personal and the historical. This book provides a complete analysis of synchronic CV -> VC metathesis in Amarasi, a language of western Timor. Metathesis and unmetathesis realise a paradigm of parallel forms, pairs of which occur to complement each other throughout the language. Metathesis in Amarasi is superficially associated with a bewildering array of disparate phonological processes including: vowel deletion, consonant deletion, consonant insertion and multiple kinds of vowel assimilation, any of which can (and do) vary by lect in their realisation. By proposing that Amarasi has an obligatory CVCVC foot in which C-slots can be empty, all these phonological processes can be straightforwardly derived from a single rule of metathesis and two associated phonological rules. Three kinds of metathesis can be identified in Amarasi: (i) Before vowel initial enclitics,

roots must undergo metathesis, responding to the need to create a phonological boundary between a clitic host and enclitic. Such metathesis is phonologically conditioned. (ii) Metathesis occurs within the syntax to signal attributive modification. Such a metathesised form cannot occur at the end of a phrase and thus requires the presence of an unmetathesised form to complete it syntactically. (iii) In the discourse an unmetathesised form marks an unresolved event or situation. Such an unmetathesised form cannot occur in isolation and requires a metathesised form to achieve resolution. Metathesis in Amarasi is the central linguistic process around which linguistic structures are organised. Amarasi metatheses also reflect fundamental Timorese notions of societal and cosmic organisation. Alongside weaving and other performed activities, metathesis is an important linguistic marker of identity in a region obsessed with similarities and differences between different groups. The complementarity of Amarasi metathesis and unmetathesis within the syntax and within discourse reflects the Timorese division of the world into a series of mutually dependent binary and complementary pairs. As well as being the key which unlocks the structure of the language, metathesis is also a reflection of the structure of Amarasi society and culture. Individuals, groups, and societies all experience and resolve conflict. In this handbook, scholars from multiple disciplines offer perspectives on the current state and future challenges in negotiation and conflict resolution. This confluence of research perspectives will identify further synergies and advances in our understanding of conflict resolution. For fans of *The Little Paris Bookshop* and *The Elegance of the Hedgehog*, *The Girl Who Reads on the Métro* is the French phenomenon by Christine Féret-Fleury, ready to charm book-lovers everywhere . . . When Juliette takes the métro to her loathed office job each morning, her only escape is in books – she avidly reads on her journey and imagines what her fellow commuters’ choices might say about them. Then she meets Soliman – the mysterious owner of the most enchanting bookshop Juliette has ever seen – and things will never be the same again. For Soliman believes in the power of books to change the course of a life, and he’s about to change Juliette’s forever . .

. Adopting Argentina’s popular uprisings against neoliberalism including the 2001-02 rebellion and subsequent mass protests as a case study, *The Mobilization and Demobilization of Middle-Class Revolt* analyzes two decades of longitudinal research (1995-2018), including World Bank and Latinobarómetro household survey data, along with participant interviews, to explore why nonpolitically active middle-class citizens engage in radical protest movements, and why they eventually demobilize. In particular it asks, how do they become politicized and resist economic and political crises, along with their own hardship? Theoretically informed by Gramsci’s notions of hegemony, ideology and class consciousness, Ozarow posits that to affect profound and lasting social change, multisectoral alliances and sustainable mobilizing vehicles are required to maintain radical progressive movements beyond periods of crisis. With the Argentinian revolt understood to be the ideological forerunner to the autonomist-inspired uprisings which later emerged, comparisons are drawn with experiences in the USA, Spain, Greece UK, Iceland and the Middle East, as well as 1990s contexts in South Africa and Russia. Such a comparative analysis helps understand how contextual factors shape distinctive struggling middle-class citizen responses to external shocks. This book will be of immense value to students, activists and theorists of social change in North America, in Europe and globally. Tulagi was the capital of the British Solomon Islands Protectorate between 1897 and 1942. The British withdrawal from the island during the Pacific War, its capture by the Japanese and the American reconquest left the island’s facilities damaged beyond repair. After the war, Britain moved the capital to the American military base on Guadalcanal, which became Honiara. The Tulagi settlement was an enclave of several small islands, the permanent population of which was never more than 600: 300 foreigners—one-third of European origin and most of the remainder Chinese—and an equivalent number of Solomon Islanders. Thousands of Solomon Islander males also passed through on their way to work on plantations and as boat crews, hospital patients and prisoners. The history of the Tulagi enclave provides an understanding of the origins of modern Solomon Islands. Tulagi was also

a significant outpost of the British Empire in the Pacific, which enables a close analysis of race, sex and class and the process of British colonisation and government in the late nineteenth and early twentieth centuries. Voltammetry is the study of current as a function of applied potential and is a category of electroanalytical methods used in analytical chemistry and various industrial processes. In this book, the authors discuss the theory, types and applications of voltammetry. Topics include voltammetric techniques in electrocatalytic studies; voltammetry and stoichiography for studying the chemical composition and real structure of solid inorganic substances and materials; voltammetric techniques applied on organic compounds related to agroalimentary and health systems; using voltammetry as a promising analytical technique in the study of compounds of biological importance; automatized determination of metallothionein by adsorptive transfer stripping techniques coupled with Brdicka reaction; overcoming drawbacks and going further with practical electroanalysis; voltammetric determination of metals as food contaminants; dual dynamic voltammetry with rotating ring-disk electrodes; linear voltammetry of anodic selective dissolution of homogeneous metallic alloys; electrooxidation of glycine and  $\alpha$ -alanine on platinum; and temperature responses in linear voltammetry. El libro se centra en el verdadero paradigma de los Kirchner: gobernar es editar. Una investigación narrada de forma tan atractiva que se lee como una novela, repleta de personajes y microhistorias increíbles. Introduction : beginning with Stigma -- The Stigma archive -- Just watching -- A sociological periplum -- Doing being deviant -- Afterword : the politics of stigma. 'This is a well researched, thorough and impressive work on climate change and agriculture in Africa. I recommend it to students, researchers and practitioners working on climate change issues' Jabavu Clifford Nkomo, senior programme specialist, IDRC This landmark book encompasses a comprehensive assessment of the potential economic impacts of future climate change, and the value of adaptation measures in Africa for different zones, regions, countries and farm types. Researchers developed and applied multiple analytical procedures to assess quantitatively how climate affects current agricultural systems

in Africa, enabling them to predict how these systems may be affected in the future by climate change under various global warming scenarios, and suggesting what role adaptation could play. The study is the first to combine spatially referenced household survey data with climatic data at both national and international levels. This book provides vital knowledge about the impacts of climate change on Africa, serving as a guide to policy intervention strategies and investment in adaptation measures. It makes a major contribution to the analysis of climate change impacts and developing adaptation strategies, especially in the highly vulnerable farming communities in the developing world. Published with CEEPA and supported by the World Bank. This book constitutes the refereed proceedings of the 4th International Symposium on Security in Computing and Communications, SSCC 2016, held in Jaipur, India, in September 2016. The 23 revised full papers presented together with 16 short papers and an invited paper were carefully reviewed and selected from 136 submissions. The papers are organized in topical sections on cryptosystems, algorithms, primitives; security and privacy in networked systems; system and network security; steganography, visual cryptography, image forensics; applications security. Oxford Studies in Early Modern Philosophy is an annual series, presenting a selection of the best current work in the history of early modern philosophy. It focuses on the seventeenth and eighteenth centuries--the extraordinary period of intellectual flourishing that begins, very roughly, with Descartes and his contemporaries and ends with Kant. It also publishes papers on thinkers or movements outside of that framework, provided they are important in illuminating early modern thought. The articles in OSEMP will be of importance to specialists within the discipline, but the editors also intend that they should appeal to a larger audience of philosophers, intellectual historians, and others who are interested in the development of modern thought. Tutorial chapters by leaders in the field introduce state-of-the-art methods to handle information integration problems of omics data. This edited volume maps new advances in theories and practices in feminist economics and the valuation of women, care and nature since Marilyn

Waring's groundbreaking critique of the system of national accounts, *If Women Counted* (1988). It features theoretical, practical and policy oriented contributions, empirical studies, and new conceptualizations, theorizations and problematizations of defining and accounting for the value of nature and unpaid household work, eco-feminism, national and international policy processes, gender budgeting, unpaid care and HIV/AIDS policy, activism and artwork, and mirrors the wide-ranging impact and resonance of Waring's work as well as the current frontiers of feminist economics. Os brasileiros acham que conhecem bem os argentinos. Afinal, nós curtimos Buenos Aires, eles desfrutam de nossas praias e uns e outros praticam a língua comum, oportunhol.

Desconfiamos de que ser argentino vai além de amar tango e churrasco, mas nem imaginamos que nossa rivalidade preferencial não é recíproca: eles detestam reconhecer, mas amam os brasileiros e preferem derrotar os ingleses à nossa seleção de futebol. Os argentinos já ganharam prêmios Nobel (nós ainda não), e o metrô de Buenos Aires, centenário, é prova de que já viveram dias melhores. Agora eles estão sempre ocupando as ruas e protestando. Seu sistema educacional e sua concentração na capital mostram um povo urbano, culto e politizado, mas a instabilidade pode ser percebida pela sucessão de líderes populistas entremeada de golpes militares. Para realmente desvendar esse povo que clama ter inventado o doce de leite e a caneta esferográfica e brilha no cinema e na literatura, o jornalista Ariel Palacios - correspondente brasileiro em Buenos Aires desde 1995 - elaborou este saboroso e imperdível "Os Argentinos". "Seaneh apapun kehidupan saya, saya tetap mensyukurinya, karena kehidupan itu sendiri sebenarnya adalah sebuah keajaiban. Bareskrim, Kebon Waru, adalah tempat mempersiapkan diri... Kami akan meneruskan perjalanan." -- Ariel "Banyak sekali spekulasi yang mengatakan kalau band ini sudah tidak akan bisa jalan lagi.... Album Suara Lainnya adalah jawaban bagi mereka yang meragukan kami." -- Uki "Saya banyak memahami soal keimanan, hubungan manusia dan Sang Khalik, dan hubungan dengan sesama manusia." -- Lukman "Ketika mengantre di kasir, seorang perempuan paruh baya mengeluarkan kalimat tak senonoh tentang diri

Ariel. Saya mencoba untuk tampak biasa-biasa saja. Istri saya langsung pergi." -- Reza "Selama masa-masa sulit itu, dalam doa, saya sangat berharap nafas jiwa saya bisa kembali hidup." -- David "A Jewish weapons manufacturer during the American Civil War, a Jewish-Canadian chair of the Metropolitan Toronto Police Board, and Jewish-Argentine guerrilla fighters-these are some of the individuals discussed in this first-of-its-kind volume. It brings together some of the best new works on armed Jews in the Americas. Links between Jews and their ties to weapons are addressed through multiple cultural, political, social, and ideological contexts, thus breaking down longstanding, stilted myths in many societies about Jews and weaponry. Anti-Semitism and Jewish self-defense, Jewish volunteers in the Spanish Civil War and in the 1948 Arab-Israeli war, and Jewish-American gangsters as ethnic heroes form part of the little-researched topic of Jews and arms in the Americas"-- Although, the first edition had a similar focus, more than five years have passed since its publication and the biological and social circumstances of the lake have drastically changed due to, for example, the further expansion of alien species, the decrease of indigenous species, the progress of integrated watershed management by the Union of the Kansai Government which was established in 2010, the legislation of the Conservation and Restoration Act of Lake Biwa in 2015 and more. The new edition will therefore feature updated and new information on the above and more topics as well as updated and revised data based on the latest research. Inventories of respective taxa, especially those of small animals, are also revised based on the latest studies. Furthermore, this volume covers the characteristics of the biota of this ancient lake, but at the same time, it will also approach it as a 'culture ancient lake'. Other topics also include water pollution, lakeshore development, the effects of global warming in the past and present, the influence of people, and countermeasures by local and national governments. Moreover, the volume also provides a comprehensive view on the future of Lake Biwa and that of its residents. Miraculously enough, this ancient lake has kept its water quality clear even until today despite the fact of more than 1.4 million people living on its shores. Finally, the book also gives

indispensable information to those engaged in improving and conserving water regimes of lakes and other water bodies all over the world and to those interested in the culture and history of Japan. Lake Biwa is not only one of the rarest ancient lakes of the world, but the people's involvement with the lake also goes back a long way. This is shown in the diverse culture developed in this area and in the various archaeological finds that date back as early as the Jomon Period, nearly 10.000 years ago. Today Lake Biwa fulfills an important role as a water resource by providing domestic, commercial, industrial, and agricultural water for over 14 million residents living around the Lake Biwa-Yodo River drainage basin. This updated volume focuses on the geological and biological features of the lake as well as on the long-term interactions between the people and the lake. This book provides a complete overview of the theory, design, and applications of unmanned aerial vehicles. It covers the basics, including definitions, attributes, manned vs. unmanned, design considerations, life cycle costs, architecture, components, air vehicle, payload, communications, data link, and ground control stations. Chapters cover types and civilian roles, sensors and characteristics, alternative power, communications and data links, conceptual design, human machine interface, sense and avoid systems, civil airspace issues and integration efforts, navigation, autonomous control, swarming, and future capabilities. Acts of Repair explores how ordinary people grapple with decades of political violence and genocide in Argentina—a history that includes the Holocaust, the political repression of the 1976–1983 dictatorship, and the 1994 AMIA bombing. Although the struggle against impunity seems inevitably incomplete, Argentines have created possibilities for repair through cultural memory, yielding spaces for transformation and agency critical to personal and political recovery. The New Jewish Argentina aims at filling in important lacunae in the existing historiography of Jewish Argentines. Moving away from the political history of the organized community, most articles are devoted to social and cultural history. How might literary scholarship engage with the sustainability debate? Aimed at research scholars and advanced students in literary and environmental studies, this collection brings together twelve essays by leading and up-coming scholars on the theme of literature and sustainability. In today's sociopolitical world, sustainability has become a ubiquitous term, yet one potentially driven to near meaninglessness by the extent of its usage. While much has been written on sustainability in various domains, this volume sets out to foreground the contributions literary scholarship might make to notions of sustainability, both as an idea with a particular history and as an attempt to reconceptualise the way we live. Essays in this volume take a

range of approaches, using the tools of literary analysis to interrogate sustainability's various paradoxes and to examine how literature in its various forms might envisage notions of sustainability. An Otago Storeman in Solomon Islands reaches from inland South Island of New Zealand across to the Solomon Islands during the 1880s. William Crossan's Otago experience as a versatile storeman with a solid work ethic helped him survive on the Melanesian frontier where he

encountered conflicting clans, cannibalism, cheating traders, and cooperative entrepreneurial big men. His diary provides many glimpses into Makiran society as it encountered new ideas, new employment, and western technology. It is a welcome addition to the sparse record of these cryptic copra traders seeking fortunes on the cusp of indigenous tradition and incoming colonialism.
