Cultivating Communities of Practice Jan 28 2020 Today's marketplace is fueled by knowledge. Yet organizing systematically to leverage knowledge remains a challenge. Leading companies have discovered that technology is not enough, and that cultivating communities of practice is the keystone of an effective knowledge strategy. Communities of practice come together around common interests and expertise- whether they consist of first-line managers or customer service representatives, neurosurgeons or software programmers, city managers or home-improvement amateurs. They create, share, and apply knowledge within and across the boundaries of teams, business units, and even entire companies-providing a concrete path toward creating a true knowledge organization. In *Cultivating Communities of Practice*, Etienne Wenger, Richard McDermott, and William M. Snyder argue that while communities form naturally, organizations need to become more proactive and systematic about developing and integrating them into their strategy. This book provides practical models and methods for stewarding these communities to reach their full potential-without squelching the inner drive that makes them so valuable. Through in-depth cases from firms such as DaimlerChrysler, McKinsey & Company, Shell, and the World Bank, the authors demonstrate how communities of practice can be leveraged to drive overall company strategy, generate new business opportunities, tie personal development to corporate goals, transfer best practices, and recruit and retain top talent. They define the unique features of these communities and outline principles for nurturing their essential elements. They provide guidelines to support communities of practice through their major stages of development, address the potential downsides of communities, and discuss the specific challenges of distributed communities. And they show how to recognize the value created by communities of practice and how to build a corporate knowledge strategy around them. Essential reading for any leader in today's knowledge economy, this is the definitive guide to developing communities of practice for the benefit-and long-term success-of organizations and the individuals who work in them. Etienne Wenger is a renowned expert and consultant on knowledge management and communities of practice in San Juan,

California. Richard McDermott is a leading expert of organization and community development in Boulder, Colorado. William M. Snyder is a founding partner of Social Capital Group, in Cambridge, Massachusetts.

Ros Thorpe, Professor of Social Work and Community Welfare, James Cook University Group

facilitation is a core skill for social workers, community workers, youth workers, health workers and psychologists. Inside Group Work offers a guide to group work theory and practice in a variety of human service settings. Drawing on thought-provoking contributions from experienced group leaders and participants, Fiona McDermott outlines the various ways in which group work can be used. Focusing particularly on psychoeducation groups, psychotherapy groups, mutual aid groups and social action groups, she explains that the purpose of the group should determine the form it takes. The key facilitation skills of listening, observing, intervening and responding under pressure are outlined. But McDermott argues these skills by themselves are not sufficient. Rather, facilitators need to 'think group' in order to be most effective. McDermott also explains the various stages groups go through, and looks at ways in which group facilitators can handle typical problems. She explores issues of power and leadership, and also the influence of gender, sexuality, ethnicity and age.
