Does the Law Morally Bind the Poor, Or, what Good's the Constitution when You Can't Buy a Loaf of Bread? Jul 21 2022 Wright (law, Cumberland School of Law, Samford U.) traces the basic legal and political implications of life for the desperately poor, arguing that the law fails to recognize the special circumstances of the severely deprived. He explores the Constitution as it is applied to the poor in our society, and advocates rejecting environmental determinism without holding the poor to unreasonable standards. Biology Of Enlightenment Sep 23 2022 In this book we meet with the modern sage, U.G. Krishnamurti, and listen to his penetrating voice describing life and reality as it is. What is body and what is mind? Is there a soul? Is there a beyond, a God? What is enlightenment? Is there a life after death? Never before have these questions been tackled with

such simplicity, candour and clarity. In these unpublished early conversations with friends (1967-71), U.G. discusses in detail his search for the truth and how he underwent radical biological changes in 1967. Preferring to call it the natural state over enlightenment, he insists that whatever transformation he has undergone is within the structure of the human body and not in the mind at all. It is the natural state of being that sages like the Buddha, Jesus and, in modern times, Sri Ramana, stepped into. And U.G. never tires of pointing out that 'this is the way you, stripped of the machinations of thought, are also functioning.'

Our Practices, Our Selves, Or, What it Means to be Human Aug 10

2021 *This enjoyable book, written in an engaging, colloquial voice, is that rare kind of introduction to philosophy that both (1) shows that philosophy is a distinctive form of lively conceptual activity rather than an inert body of dusty doctrines and (2) makes a contribution to the field it introduces by showing the importance of our multifarious human practices to questions of selfhood and identity. The fundamental thesis of the book--that practices are constitutive of the self in a deep way that has not been sufficiently recognized--is explored through wide-ranging examples, including global-technological capitalism, religious authority and the creationism debate, multiculturalism, psychoanalytical explanation, jazz, baseball, political activism, cooking, and many others. These diverse strands, although they obviously come from far and wide, are convincingly woven into a coherent and illuminating large-scale pattern. This book shows the student, the general reader, or anyone interested in what philosophy--itself a practice--how hard, clear thinking promotes human understanding and how helpful analytical thought can be to numerous hotly debated issues. Readers are given the conceptual tools and philosophical equipment they need as the book*

progresses, and they will know that they are in the hands of an excellent, confidence-inspiring teacher of the subject. -Garry L. Hagberg, Bard College
