Darren Weeks is Canada's most prominent financial educator. He is the Founder of the Fast Track Group of Companies, an acclaimed solutions-based financial literacy firm and one of the nation's fastest-growing companies. For nearly a decade and a half, Darren has spoken to hundreds of thousands of people across North America, Europe and Latin America about how to become financially independent. He is an advocate of learning how to create wealth through business and investment, and believes that this vital knowledge is lacking from traditional education. In fact, in every country that he has spoken Darren has seen that schools do not teach their students to manage money. Darren has made it his mission to fill that void by providing financial education to people across the world. He went from an average middle-class upbringing to raising hundreds of millions of dollars in investor capital, owning nearly 5,000 real estate properties, millions of dollars in energy assets and acquiring two cruise ship terminals in the Caribbean. All of this was accomplished by educating himself on how to do it and then taking action. There is no greater expert on the art of raising capital from investors and no person more committed to sharing this information than Darren Weeks. "There are some people that walk around on two feet and others like me that run on all four." To most people, that's a bold statement. I just wish I'd been the one to say it, but I wasn't. In fact, until a few days ago, I wasn't even sure what it meant. You might say that, on the surface, it's a very simple concept: Either you're the type of person who lives within a set of boundaries or the type who knows none. But life is never that simple, is it? No, I'd say that the most important insights about who we are, what we say, and why we do things are not always the obvious ones. Instead, they're discovered on the streets of your hometown, revealed late at night in a dark backroom, or sometimes forced upon you at knifepoint where your only choices for survival are between bad and worse. In *The Art of Raising Hell*, Newbie Johnson has recently moved to Bunsen Creek, Illinois, when his mother is killed in a tragic car crash. His father does his best to maintain a normal household, but his broken heart is just not up to the task. Newbie finds solace by hanging out with his three buddies in their

clandestine Backroom hideout. Getting into mischief becomes their favorite pastime as they try to follow in the footsteps of Lonny Nack, who has perfected the art of running on all four. "Running on all four" takes on a new meaning for Newbie when he finds his inner voice and begins to understand the difference between chasing life and being chased by it. Each day brings new tests and challenges - and incredible happiness as we watch our children grow from helpless newborn to independent teen. "THE ART OF RAISING HAPPY KIDS" can't provide all the answers, but it can help resolve some often biggest issues facing parents, from coping with the sniffles to navigating social media. Whether you're cradling an infant or getting ready to send you child off to college, the most important things is to enjoy the ride! Every parent wants their child to be happy, healthy and well adjusted. But in an ever-changing world, how do we do just that? In this book, experts in child development, pediatrics, psychology and social work provide simple, straightforward advice on how to help your child grow up to be a strong, caring individual. It includes information on what it takes to keep a child healthy, including the newest research on nutrition, sleep, exercise and development. It illustrates how to build strong family ties, including bolstering emotional intelligence, effective communication strategies, and why it's okay to let your child occasionally fail. Plus: Advice on navigating the world at large, from finding a balance with social media to coping with bullies and overcoming depression. Finally, developmental guidelines for every age, from newborns to teens, help the reader navigate the changes a child will face. Parenting can be a challenge, and this book is here to make the journey a little bit easier. Our Lord and Satan are in a fierce battle for the soul of your daughter. If God is to win, you must do your part as a man, leading her as the Good Shepherd leads us all. You've got to stop being an overworked, out-of-touch father, and become the firm but gentle leader of your home. In these honest and insightful pages – based on decades of his own experiences with his three daughters – author Alan Migliorato admits that it takes sustained efforts to learn the manly art of raising a daughter. But the reward is great, yielding just the kind of father-daughter relationship your daughter needs if she is to grow into a strong, well-balanced woman of faith. Among other things you'll learn here are: • How to repair a damaged relationship with your daughter – and even your wife • Why it's important to know your daughter's friends – and how to do it • How to teach your daughter to put God first in her life • The three things you must know about dealing with your daughter's boyfriend • How to teach your daughter to defend herself physically, emotionally, and spiritually • The five signs your daughter is addicted to social media – and what to do about it • The seven things you must do to be a manly man With the help of the wise advice in these pages, your daughter will grow holier, your marriage better, and your family happier – all because you've mastered the manly art of raising a daughter! "A brilliant book, overflowing with wisdom." —Philip J. Ivanhoe, author of Confucian Reflections

The ancient Chinese philosopher Mencius compared children to tender sprouts, shaped by soil, sunlight, water, and the efforts of patient gardeners. At times children require our protection, other times we must take a step back and allow them to grow. A practical parenting manual, philosophical reflection on the relationship between parent and child, and necessary response to modern stereotypes of Eastern parenting, *Little Sprouts and the Dao of Parenting* reconsiders cultural definitions of success and explores how we might support and nourish young people. Engaging deeply with foundational Daoist and Confucian thinkers, philosopher Erin Cline shows how we can strengthen innate virtues of compassion, generosity, and individuality in our own tender sprouts. Author Kathleen Deyer Bolduc knows these feelings of helplessness from experience. She and her son navigated through his childhood and now approach yet another new life phase -- adulthood -- and all that entails. In *The Spiritual Art of Raising Children with Disabilities*, Bolduc uses the metaphor of the mosaic to life as parents of children with disabilities. How do you rearrange the fragmented and chaotic pieces of your family into a perfectly whole and beautiful work of art? Readers are walked through the process using the spiritual disciplines to help you recognize God's presence in your life and regain the balance we all need. In this book, writer, parent, and spiritual director Kathleen Deyer Bolduc -- with honesty and humor, wisdom and wit -- invites the caregivers of children with disabilities to steep themselves in Scripture and self-reflection. The account of one radically new school year for a Teacher of the Year and for his nonbinary, art-obsessed, brilliant child Seven-year-old Ollie was researching local advanced school programs—because every second grader does that, right? Ollie, who used to hate weekends because they meant no school, was crying on the way to school almost every day. Sure, there were the slings and arrows of bullies and bad teachers, but, maybe worse, Ollie, a funny, anxious, smart kid with a thing for choir and an eye for graphic art, was gravely underchallenged and also struggling with

identity and how to live totally as themselves. Ollie begged to switch to a new school with “kids like me,” where they wouldn’t feel so alone, or so bored, and so they made the change. Raising Ollie is dad Tom Rademacher’s story (really, many stories) of that eventful and sometimes painful school year, parenting Ollie and relearning every day what it means to be a father and teacher. As Ollie—who is nonbinary and uses they/them pronouns, and prefers art to athletics, vegetables to cake, and animals to most humans—flourishes in their new school, Rademacher is making an eye-opening adjustment to a new school of his own, one that’s whiter and more suburban than anywhere he has previously taught, with a history of racial tension that he tries to address and navigate. While Ollie is learning to code, 3D model, animate, speak Japanese, and finally feel comfortable at school, Rademacher increasingly sees how his own educational struggles, anxieties, and childhood upbringing are reflected in his teaching, writing, and parenting, as well as in Ollie’s experience. And with this story of one anything-but-academic year of inquiry and wonder, doubt and revelation, he shows us how raising a kid changes everything—and how much raising a kid like Ollie can teach us about who we are and what we’re doing in the world. In this new book, renowned dog trainer Kathy Sdao reveals how her journey through life and her decades of experience training marine mammals and dogs led her to reject a number of sacred cows including the leadership model of dog training. America's foremost authorities on dog care and training distill decades of experience in a comprehensive "foundational" guide for dog owners. No matter what training method or techniques you use with your dog, the training is unlikely to be optimally successful unless it is predicated on an understanding of the dog's true nature. Dogs need food, water, exercise and play, rest, veterinary care -- the basics. But since dogs naturally want to be led, they also need focused and compassionate guidance. Through abundant stories and case studies, the authors reveal how canine nature manifests itself in various behaviors, some potentially disruptive to domestic accord, and show how in addressing these behaviors you can strengthen the bond with your dog as well as keep the peace. The promise of this book is that, especially in an ever-accelerating world filled with digital

distractions, you can learn from your dog's example how to live in the moment, thereby enriching your life immeasurably. The infamous literary hoax that fooled the art world On January 8 1960, artist Nat Tate set out to burn his entire life's work. Four days later he jumped off a Staten Island ferry, killing himself. His body was never found. When William Boyd published his biography of Abstract Expressionist Nat Tate, tributes poured in from a whole host of artists and critics in the New York art world. They toasted the troubled genius in a Manhattan launch party attended by David Bowie and Gore Vidal. But Nat Tate never existed. The book was a hoax. Will Boyd's biography of a fake artist is a brilliant probe into the politics of authenticity and reputation in the modern art scene. It is a playful and intelligent insight into the fascinating, often cryptic world of modern art. Zen and the Art of Raising Chickens explores the entertaining, rewarding, and - yes - enlightening art of keeping chickens in an urban or suburban garden. Chickens slow us down and ground us. This book demonstrates how raising chickens can easily fit into a busy lifestyle, and why doing so helps keep us sane and focused on the simpler joys of life. Applying the ancient yet timeless 81 principles of Taoism to parenting, The Tao Of Parenting features instructive anecdotes from four families to demonstrate how Taoist teachings help parents raise good, healthy children. The stories are just as diverse as the families who tell them (a blended family featuring children from separate marriages, a couple with different cultural and ethical backgrounds, a single parent of twin boys, and a couple with different parenting techniques learning to compromise). Some of the Taoist principles used by these families include: *Do Not Think of Self. Shows the rewards parents receive by making their children their number one priority. *The material is fleeting, the spiritual is everlasting. Demonstrates the rewards of caring for those in need. *Do Not Be Authoritarian. Shows how to foster self-reliance and responsibility in children while supporting their efforts, rather than controlling their every move. *Follow the middle road; it is the heart of knowing. Offers the benefits of parents being neither too permissive or too strict, but rather adjusting the rules for each child and each circumstance. There are many more valuable lessons in this special book which can be used by parents of all faiths to help guide their lives and those of their

children. Playing off the themes in the Caldecott Medal-winning children's book *Where the Wild Things Are*, this informative, practical, and encouraging guide will help parents guide boys down the path to healthy and authentic manhood. *Wild Things* addresses the physical, emotional, and spiritual parts of a boy, written by two therapists who are currently engaged in clinical work with boys and their parents and who are also fathers raising five sons. Contains chapters such as "Sit Still! Pay Attention!" "Deficits and Disappointments," and "Rituals, Ceremonies, and Rites of Passage." The beloved host of PBS Kids' *Dinosaur Train* presents an activity-complemented guide for caregivers and teachers on how to alleviate common childhood challenges by forging strong connections between children and nature. 25,000 first printing.

Swimming improves your flexibility, tones your body and can help to boost your self-esteem and produce a sense of well being. It is the nation's most popular sporting activity with 11.9 million people swimming regularly. However, most people don't know how to swim properly. This book is based on a 35-year voyage of discovery into the art of swimming. Steven Shaw's method takes the Alexander Technique into the swimming pool – focusing on releasing tension from the head, neck and back. Steven has evolved a unique way of breaking down strokes into a series of therapeutic movements, which can be practised individually or with a partner, in a pool or on dry land. These provide the building blocks, which combine to make it possible for anyone to recraft their own strokes in a way that promote good body use and avoid injuries. Instead of performing physical actions in an automatic way, you begin to learn body awareness. This way of swimming not only feels freer and more open, it is graceful and has a sense of flow, often absent from the way many people swim. Shaw looks at the most popular strokes – front crawl, back stroke, breast stroke and butterfly – focusing on maximum efficiency and minimum strain.

The oldest cultures in the world have mastered the art of raising happy, well-adjusted children. What can we learn from them? “*Hunt, Gather, Parent* is full of smart ideas that I immediately wanted to force on my own kids.” —Pamela Druckerman, *The New York Times Book Review* When Dr. Michaela Doucleff becomes a mother, she examines the studies behind modern parenting guidance and finds the evidence frustratingly limited and the conclusions often ineffective. Curious to learn about more effective parenting approaches, she visits a Maya village in the Yucatán Peninsula. There she encounters moms and dads who parent in a totally different way than we do—and raise extraordinarily kind, generous, and helpful children without yelling, nagging, or issuing timeouts. What else, Doucleff wonders, are Western parents missing out on? In *Hunt, Gather, Parent*, Doucleff sets out with her three-year-old daughter in tow to learn and practice parenting strategies from families in three of the world’s most venerable communities: Maya families in Mexico, Inuit families above the Arctic Circle, and Hadzabe families in Tanzania. She sees that these cultures don’t have the same problems with children that Western parents do. Most strikingly, parents build a relationship with young children that is vastly different from the one many Western parents develop—it’s built on cooperation instead of control, trust instead of fear, and personalized needs instead of standardized development milestones. Maya parents are masters at raising cooperative children. Without resorting to bribes, threats, or chore charts, Maya parents rear loyal helpers by including kids in household tasks from the time they can walk. Inuit parents have developed a remarkably effective approach for teaching children emotional intelligence. When kids cry, hit, or act out, Inuit parents respond with a calm, gentle demeanor that teaches children how to settle themselves down and think before acting. Hadzabe parents are world experts on raising confident, self-driven kids with a simple tool that protects children from stress and anxiety, so common now among American kids. Not only does Doucleff live with families and observe their techniques firsthand, she also applies them with her own daughter, with striking results. She learns to discipline without yelling. She talks to psychologists, neuroscientists, anthropologists, and sociologists and explains how these strategies can impact children’s mental health and development. Filled with practical takeaways that parents can implement immediately, *Hunt, Gather, Parent* helps us rethink the ways we relate to our children, and reveals a universal parenting paradigm adapted for American families. “If you’re raising a boy, you need this brilliant book. It is clear, wise, and eye-opening.” —Lisa Damour, Ph.D., author of *Untangled* When boys enter puberty, they tend to get quiet—or at least quieter than before—and parents often misread their signals. Here’s how to navigate their retreat and steer them through this confusing passage, by the bestselling author of *The Care and Keeping of You* series and *Guy Stuff: The Body Book for Boys*. What is my son doing behind his constantly closed door? What’s with his curt responses, impulsiveness, newfound obsession with gaming, and . . . that funky smell? As pediatrician and mother of two teenagers Cara Natterson explains, puberty starts in boys long before any visible signs appear, and that causes confusion about their changing temperaments for boys and parents alike. Often, they also grow quieter as they grow taller, which leads to less parent-child communication. But, as Natterson warns in *Decoding Boys*, we respect their increasing “need” for privacy, monosyllabic conversations, and alone time at their peril. Explaining how modern culture mixes badly with male adolescent biology, Natterson offers science, strategies, scripts, and tips for getting it right: • recognizing the first signs of puberty and talking to our sons about the wide range of “normal” through the whole developmental process • why teenagers make irrational decisions even though they look mature—and how to steer them toward better choices • managing video game and screen time, including discussing the unrealistic and dangerous nature of pornography • why boys need emotional and physical contact with parents—and how to give it in ways they’ll accept • how to prepare boys to resist both old and new social pressures—drugs, alcohol, vaping, and sexting • teaching consent and sensitivity in the #MeToo culture *Decoding Boys* is a powerful and validating lifeline, a book that will help today’s parents keep their sons safe, healthy, and resilient, as well as ensure they will become emotionally secure young men. Praise for *Decoding Boys* “Comforting . . . a common-sensical and gently humorous exploration of male puberty's many trials.”—Kirkus Reviews A thrilling, eye-popping look at true crime in the billion-dollar art world. The

art world is one of the most secretive of global businesses, and the list of its crimes runs long and deep. Today, with prices in the hundreds of millions for individual artworks, and billionaires' collections among the most conspicuous and liquid of their assets, crime is more rampant than ever in this largely unregulated universe. Increased prices and globalization have introduced new levels of fraud and malfeasance into the art world--everything from "artnapping," in which an artwork is held hostage and only returned for a ransom, to forgery and tax fraud. However, the extent of the economic and cultural damage that results from criminality in the global art scene rarely comes to light. The stories of high-stakes, brazen art crimes told by art experts Stefan Koldehoff and Tobias Timm are by turns thrilling, disturbing, and unbelievable (the imagination for using art to commit crimes seems boundless). The authors also provide a well-founded analysis of what needs to change in the art market and at museums. From the authors of *False Pictures, Real Money* (about the Beltracchi art forgery case), *Art and Crime* includes a chapter on art owned by Donald Trump. It is a thoroughly researched, explosive, and highly topical book that uncovers the extraordinary and multifarious thefts of art and cultural objects around the world. An Entertaining, Enlightening Look at the Art of Raising Self-Reliant, Independent Children Based on One American Mom's Experiences in Germany An NPR "Staff Pick" and One of the NPR Book Concierge's "Best Books of the Year" When Sara Zaske moved from Oregon to Berlin with her husband and toddler, she knew the transition would be challenging, especially when she became pregnant with her second child. She was surprised to discover that German parents give their children a great deal of freedom—much more than Americans. In Berlin, kids walk to school by themselves, ride the subway alone, cut food with sharp knives, and even play with fire. German parents did not share her fears, and their children were thriving. Was she doing the opposite of what she intended, which was to raise capable children? Why was parenting culture so different in the States? Through her own family's often funny experiences as well as interviews with other parents, teachers, and experts, Zaske shares the many unexpected parenting lessons she learned from living in Germany. *Achtung Baby* reveals that today's Germans know something that American parents don't (or have perhaps forgotten) about raising kids with "selbständigkeit" (self-reliance), and provides practical examples American parents can use to give their own children the freedom they need to grow into responsible, independent adults. Fully train your dog in just six weeks with this revolutionary new method. The Monks of New Skete, long-time breeders of German shepherds and renowned trainers of all breeds and mixes, have codeveloped a successful new training technique. They and Marc Goldberg, who pioneered the approach, offer you and your canine companion a way forward using a game-changing tool: the invisible leash or electronic collar. Now in paperback, *The Art of Training Your Dog* presents their compassionate, efficient system along with helpful advice on choosing the best collar. At the right moment, using a light touch—that many humans can't even feel—strategically refocuses your dog's attention. This method helps you create effortless teaching moments that tie into your dog's pack instincts and help strengthen your bond with your dog. In as little as six weeks, your pup can master good leash manners; obey basic commands, such as sit, down, and stay; stop problematic behaviors; and play safely off leash with consistent recall. It offers clear insights into what motivates the most challenging behaviors, and what kinds of responses turn these behaviors around. "One of the best books on child-rearing I've ever read. Joe Newman describes a cultural shift that has reinforced anxiety and behavior disorders in children by negating parental authority. Even more important, he provides specific, non-punitive ways for parents to help their kids by taking back their authority. Filled with examples and experiences from the author's own life as a child with A.D.H.D., the book is a treasure-trove of useful information." Barry Michels, psychotherapist and New York Times bestselling author of The Tools. "This book is packed with useful information. It is an insightful and practical guide for managing children. I would recommend it to any parent." L. Alan Sroufe, Professor Emeritus Ph.D. University of Minnesota Current childrearing techniques seek to develop children who are confident, self-assured, and unafraid to speak their minds--lions instead of lambs. Although largely positive, this shift has brought with it some very serious problems in our children's behavior. Without going back to an authoritarian model, Joe Newman has developed new ways of helping children develop the ability to self-regulate without undermining their confidence and individuality. Raising Lions challenges us to re-examine our interactions and relationships with children, re-think the root causes of behavior problems and find new ways to support healthy, happy development. For over 20 years Joe Newman has worked with children, parents, teachers, and administrators to help them understand and improve child behavior.
